

# Smart Hotel

Welcome to V-ISmart hotel, where hospitality meets the technology of tomorrow, where comfort, quality and high-tech luxury meet under the roof of affordability.

## How it works?

### Check In

As soon as the guest checks-in, they would receive a link via SMS and email. The link gives the access to smart guest room.

### Smart Guest Room

Guest can control all the appliances in smart guest room using webapp from the link. They can change channels using voice or set mood by playing pre defined scenes and much more.

### Smart Hotel Services

Provide Hotel services to your guest using the webapp. They can book slots, access promotions offered by Hotel and also give feedback.

## Checkout

Impressed by the smart hotel, the guests would want to leave a five star feedback. The webapp access will be revoked as soon as they checkout.

# Smart Hotel Services

Provide access to all the Hotel Services in the same webapp. Customers can easily request Hotel Services in one tap.

View the restaurant(s) (in hotel) menu, checkout daily specials and Place Orders.

Schedule laundry, housekeeping and other services at customers' convenient timings.

View promotions for different services with discounts, offers, coupons etc.

Customer feedback is enabled everytime a requested service is fulfilled

Checkout nearby tourist attractions, ATMs, etc., using webapp.

Smart Guest Room

# Smart Hotel for Smart Traveler

## No App Installation

Smart room access is granted to the guest with an elegant guest webapp that can be opened with an SMS or an email link sent during check-In. No need to download any app from the Play store or App store.

## Control Everything

Turn on/off any switch or plug in the room with just a tap on the webapp. Control all IR appliances in the room such as TV, AC and Set-Top box and also get comprehensive entertainment guide.

## Voice Control

Control all the appliances in the smart room, change channels, setup scenes and do much more with your voice. Supports Amazon Alexa and Google Home.

# Everything in One Web App.

## Food Menu

View hotel menu, and order food from the webapp

## Webapp Dashboard

The guest can directly access all the hotel services from the webapp's homepage.

## AC Remote

Power on/off, change temperature and heat settings etc. with the webapp.

## Play Customized Scenes

Activate a scene by tapping the scene option

## Switches Tab

All smart switches and plugs switches in the room can be operated from this tab.

## Set-top Box Remote

Avail all buttons from the physical remote, in addition set reminders, favourites, etc.

# Make your Hotel smart now!

Impress your guests like never before
